TELL: 00497127932970

Greetings from Mbamba bay High School.

Dear Brothers from Neckatrtzlingen High School in Auwlesee n4 Germany. I m exceedingly humbled and profoundly honored to send my hallow to you.

I have decided to take this opportunity to acknowledge you with thanks giving for the big support that you made to us by providing us the water project that really we appreciate to the maximum our hearts. This is because we didn't have enough water supply before you come to see us and decided to help us with that big project of water supply may God bless you to the extent of prosperity and successfulness.

Dear Brother Teacher Daniel Qushdof (in Swahili Mwalimu Daniel Qushdof) without forgetting moral support from Mama Chengula and Mzee Chengula who have played a big role to meet you, we thank for their vision to find solutions of problems to the needs as you did to Mbamba bay High School.

Therefore not only School Students who benefiting from this project but also the Community around the School are enjoying the Water Supply Service. There before we had 612 Students but as I m writing to you now the school is having 1016 Students registered, this is because there is enough water supply hence there is an increase of 50% of Student who are coming to School for boarding.

Dear Brother Daniel my aim of making this writing to you, Me as a Geography Teacher and Civic Education Teacher from Mbamba bay High School is to ask for the direct friendly correspondence from Neckatrtzlingen High School and Mbamba bay High School I hope if this correspondence can be cherished between us perhaps can bring more success through exchange of teaching resources.

Finally, we thank the Family of Mama Chengula again, Mzee Chengula and Teacher Daniel Qushdof for bringing us together.

Note: I have deployed pictures of students to show the way they enjoy water project together with my pictures.

It is me.
